Rose Hill is the perfect cattle or horse property, as it has about 180 acres of pasture fenced and cross-fenced on rolling hills that give the property a western ranch appearance. The property has a five acre lake and a one acre pond that are stocked with bass and bream. It also has two pastures growing bermuda to provide hay for livestock during the winter. The upper part of the farm has rolling hills covered with large oaks and hickories mixed with eastern cedars. This is the perfect livestock recreation property.
